SUMMARY

Passionate Computer Science undergrad with a strong foundation in backend development and current hands-on learning in Node.js and JavaScript. Eager to contribute to high-performance backend systems and scalable APIs. Looking to grow as a Node.js backend developer by joining a dynamic team and building innovative fintech solutions.

WORK EXPERIENCE

Web Developer Intern – Startupodero   **Feb2024 - May2024**

- Designed and developed both frontend and backend features for dynamic websites
- Implemented responsive layouts using HTML, CSS, JavaScript
- Contributed to backend APIs using Node.js and Express.js for data management
- Collaborated with design and dev teams to deliver full-stack solutions

Software Training – Metacrafters   **Jun 2023 – Aug 2023 | Remote (Stipend-based)**

- Completed JS Proof, ETH EVM beginner to advanced courses
- Worked with multiple blockchain networks including Ethereum, Avalanche (AVAX), Polygon, and others
- Gained hands-on exposure to blockchain fundamentals, smart contracts, and DeFi use cases

PROJECTS

Forkify Recipe Search App   **HTML, CSS, JavaScript, Nodejs, React,**

- Developed a dynamic web app to search and view recipes using an API
- Added bookmarking, adjustable servings, and ingredient logic

Personal Diary Web App   **Node.js, Express.js, MongoDB, React,**

- Built a secure diary web application with user authentication and CRUD functionality

EDUCATION

Bachelor of Science in Computer Science   Nov 2021 - June 2025
Chandigarh University, Punjab | CGPA: 7.82

Intermediate (CBSE)   2019 – 2020 |
 Nachiketan Model Sen. Sec. School   Percentage: 89.6%

Matriculation (CBSE)   2017 – 2018 |
 Nachiketan Model Sen. Sec. School   Percentage: 89.4%

TECHNICAL SKILLS

- **Problem-Solving Skills:** Strong analytical thinking, debugging and troubleshooting, logic development, time complexity optimization, and real-world application of algorithms (400+ problems solved on platforms like LeetCode and Coding Ninjas)
- **Languages:** JavaScript, C++, C, JAVA, Node.js
- **Frameworks & Libraries:** React , Next.js, Express.js(basics) , Tailwind
- **Databases:** MongoDb and MYSQL
- **Tools** : Postman, Git
- **Concepts**: REST APIs, MVC, JWT Authentication, Responsive Web Design, Backend Development with Node.js
